

EQACC SOLAR

Low temperature 21700 battery factory pack

Overview

Does a 21700 battery have a reversible heat generation?

Due to the importance of this issue, in this investigation, both experimental and numerical studies are conducted on the cooling of the 21700 battery and battery packs with two distinct arrangement designs of 5×6 and 2×15 . The electrochemical model is utilized to predict the battery's irreversible and reversible heat generation.

What is a BMS battery pack?

The advanced BMS features over-charge protection, over-discharge protection, cell balancing, and multiple safety mechanisms to ensure maximum reliability and longevity. Custom 7S 25.2V 21700 battery pack with higher energy 21700 cells, BMS with cell balancing, overcharge protection, and IP68 waterproof.

What is the temperature distribution of a battery pack?

At the 1C discharge rate, most of the battery pack temperature shows a dark blue temperature distribution with maximum temperature about 36 °C, and at the 2C discharge rate, the temperature of the battery pack gradually produces a light blue temperature distribution with maximum temperature about 51 °C.

What is the thermal management of lib-21700 battery?

Experimental and numerical investigations on thermal management of LIB-21700. The numerical analysis is carried out by the lumped model for 5×6 and 2×15 packs. Both battery packs operate under 40 °C only for 1C discharge rate. For discharge rates of 2C, internal temperature of battery is greater than 50 °C.

Low temperature 21700 battery factory pack

Custom 21700 Low Temperature Battery manufacturer

As China manufacturer of 21700 Low Temperature Battery, Large Power has been focusing on custom rechargeable Low Temperature Battery pack for 16 years.
