Lusaka Commercial Uninterruptible Power Supply Equipment

Overview

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) provides a source of power for the equipment it protects. If there is a disruption to power, the UPS has an on-board battery to automatically supply to electrical equipment until the disruption is over or back-up generators kick-in. What is a WIMES UPS?

Why should you choose Mitsubishi Electric uninterruptible power supplies?

At 99.9995%, Mitsubishi Electric Uninterruptible Power Supplies achieve the highest equipment reliability among all UPS suppliers, ensuring you – and your customers – are protected against downtime 24/7/365.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and revenue.

What is a water power supply (UPS)?

WIMES (Water Industry Mechanical and Electrical Specifications) UPS (uninterruptible power supply) is a robust critical power system built for harsh atmospheres such as dusty environments, moisture and humidity, as well as extremes in temperature and sites where robust solutions are required.
