# **Magadan Energy Storage Power Station Subsidy**

## Overview

---

Are energy storage power stations subsidized in Inner Mongolia?

For example, in December 2022, the People's Government of Inner Mongolia Autonomous Region issued a document stating that energy storage power stations included in the region's demonstration projects will enjoy capacity subsidies, with a subsidy of 0.35 yuan per kilowatt-hour for actual discharges, and the subsidy period will not exceed ten years".

Do energy storage subsidies affect 'new energy + storage' projects?

Furthermore, while the Chinese government has introduced new energy storage policies and corresponding subsidies to promote renewable energy consumption, few scholars have considered the economic effects of energy storage subsidies on "new energy + storage" projects.

Does China need a subsidy analysis for photovoltaic energy storage integration?

In the context of China's new power system, various regions have implemented policies mandating the integration of new energy sources with energy storage, while also introducing subsidies to alleviate project cost pressures. Currently, there is a lack of subsidy analysis for photovoltaic energy storage integration projects.

Do energy storage subsidy policies stimulate photovoltaic energy storage integration projects?

The results indicate that, while the current energy storage subsidy policies positively stimulate photovoltaic energy storage integration projects, they exhibit a limited capacity to cover energy storage investment costs, thereby failing to incentivize capital market participation in the construction of such projects.

## Magadan Energy Storage Power Station Subsidy

---

### Magadan Thermal Power Station , Wilson Center

Magadan Thermal Power Station is a (n) coal-based power plant. It is owned by PJSC "Magadanenergo". Its estimated electrical generating capacity is 96.0 megawatts.
