# **Majuro Outdoor Power System**

## Overview

---

Why does Majuro need a new power system?

In order to stabilize power service, the Marshalls Energy Co. was forced to import more than half-a-dozen rental containerized generators last year that currently provide the backbone of Majuro's power. International donors and the Marshall Islands government have lined up to fund a huge overhaul of the power system for Majuro.

What is the Majuro power network strengthening project?

The Majuro Power Network Strengthening Project is a project that supports the Republic of the Marshall Islands' (RMI) renewable energy targets and greenhouse-gas (GHG) emissions reduction targets through investments in the Majuro distribution network.

What fuel does Majuro use?

Majuro has a high reliance on imported petroleum fuel. Approximately 98% of its annual power generation of approximately 53.7 GWh comes from diesel.
