

EQACC SOLAR

Male backup power storage system

Home Energy Storage (Stackble system)

High Efficiency

Easy installation

Safe and Reliable

Perfect Compatibility

Product Introduction

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimization
- Integrated with inverter to avoid the compatibility problem

- LFP battery, safest and long cycle life
- Stackable design, effortlessly installation
- Capable of High-Powered
- Emergency-Backup and Off-Grid Function

Overview

What is a home backup battery bank?

A home backup battery bank is suitable for both fully grid-powered homes and homes with renewable energy-generation systems looking to be partially or fully energy-independent. These systems power homes through energy outages and low-generation days in off-grid homes, maximize self-consumption, and more.

What is a whole home power backup solution?

For more extended power outages (and greater energy security), the advanced EcoFlow Whole Home Power Backup Solution combines two EcoFlow DELTA Pro portable power stations with a double voltage hub. With a combined output and storage capacity of 7200W, you can fully power the average home for 1-2 days.

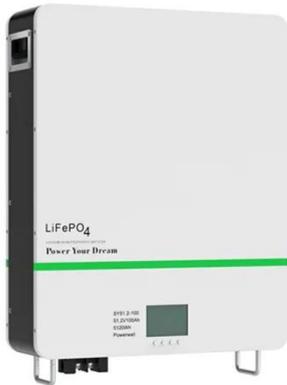

Why do you need a backup energy storage system?

Having a backup energy storage system will ensure uninterrupted power, which will give you the energy independence you deserve, powering your home through any crisis. Grid-tied homes mainly use solar battery banks as a backup energy storage system, storing the generated energy for later use.

What is a whole-house battery backup system?

A whole-house battery backup system is the ultimate solution for home energy security. It provides automatic, reliable power during outages without noise, fumes, or fuel dependency. If you're considering a more innovative, cleaner backup energy solution, this guide covers everything you need to know. Part 1. What is a house battery backup system?
