# Marseille foreign trade energy storage power supply

## Overview

---

How does the port of Marseille use photovoltaic energy?

In parallel, the Port of Marseille Fos is working to develop photovoltaic energy production by equipping the roofs of hangars and warehouses. Today, the Port supplies ships with power from the national ENEDIS network. The electricity is guaranteed 100% renewable, thereby ensuring the maximum environmental benefit.

How will the port of Marseille Fos be financed?

civil engineering works, electrical equipment, distribution to berths and mobile connection systems (CMS). The Port of Marseille Fos aims to eventually connect a 3rd and 4th cruise ship. This work will be financed by the French government via the Recovery Plan, the Southern Region, the Aix Marseille Metropolitan Area and the Department of 13.

Is Marseille a 100% renewable port?

The electricity is guaranteed 100% renewable, thereby ensuring the maximum environmental benefit. With its photovoltaic roofs, over the next few years the Port aims to produce 100% self-generated energy, fed into the internal network. LNG-powered cruise ships have been calling at Marseille since 2019.

What does the port of Marseille Fos do?

For several years now, the Port of Marseille Fos has undertaken a series of concrete actions that address air quality and the energy transition. It encourages and assists ship owners to comply with the regulations in force on fuels designed to reduce polluting emissions.
