# **Middle East Commercial Energy Storage Project**

## Overview

---

Is large-scale energy storage a viable option in the Middle East?

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy projects expanding across the region, energy storage has started gaining traction.

Is energy storage gaining traction in the Middle East?

With renewable energy projects expanding across the region, energy storage has started gaining traction. Unlike Europe, North America, and Asia, where renewable energy and storage technologies are well-established, the Middle East remains in the early stages of development.

What is the potential for energy storage in Saudi Arabia?

The potential for energy storage in the Kingdom of Saudi Arabia (KSA) is significant, given the country's abundant resources and growing demand for energy. With a rapidly expanding population and economy, KSA is facing increasing energy demand.

Does the UAE have energy storage systems in the GCC region?

The UAE has installed most of the energy storage systems in the GCC region. In 2016, Abu Dhabi Water & Electricity Authority announced the deployment of around 108 MW of sodium-sulfur-based BESS with an individual capacity of around 4 MW and 8 MW at different locations to support their distribution network.
