

Moldova containerized generator plant

Overview

Will a new power plant increase Moldova's electricity generation capacity?

According to Constantin Borosan, State Secretary of the Ministry of Energy, once installed, these plants will increase Moldova's electricity generation capacity by at least 125 MW, and if the 10 smaller plants are received, the total will reach 225 MW.

How important is Moldova's cross-border power system?

Geographically positioned between Romania and Ukraine, the cross-border power system of the Republic of Moldova is critical for regional energy security and regional integration with the European and Moldova-Ukraine energy markets.

How long will a 125 MW power plant last in Moldova?

The decision, approved today by the Commission for Exceptional Situations, provides for the free transfer to Moldova of a 125 MW power plant and 10 smaller plants with a combined capacity of 100 MW. The smaller plants could be installed within three to five months.

How much energy does Moldova need in 2023?

This means that in summer CHPs are off, and the imports from Transnistria meet about 90% of the total domestic electricity demand. Committed renewable energy capacity in the Republic of Moldova by 2030 is expected to reach 700MW. In 2023, renewable energy generation met 10.5% of the energy demand, compared to 5.5% in 2022.
