

# Montenegro energy storage exports

## Overview

---

What is the energy development strategy of Montenegro?

The Energy Development Strategy of Montenegro sets out objectives and defines mechanisms for the transition from the current energy system to a safe, competitive and environmentally acceptable energy paradigm by 2025. It also provides guidelines for.

Does Montenegro have hydro power plants?

Montenegro has the potential to develop additional hydro power plants given its abundance of rivers and streams, as mentioned in the Agreement of the Electro-Energetic Community for Southeastern Europe signed on Janu. The country's energy market was opened to competitors.

Can Montenegro produce oil and gas?

Montenegro does not have the necessary technology or experience to produce oil or gas. Additionally, successful energy exploration must consider the environmental impact of operations, as coastal tourism is a significant contributor to the country's revenues.

Where is electricity produced in Montenegro?

The majority of electricity in Montenegro is primarily produced at the Pljevlja coal-fired Thermal Power Plant and the Perucica and Piva Hydropower Plants. The core activities of the majority state-owned Electrical Power Company of Montenegro (EPCG) are electricity generation, transmission, distribution, and supply.
