# Moscow EKlfp solar container battery

## Overview

---

What are CATL battery-powered energy storage systems?

CATL battery-powered energy storage systems provide energy storage and flexibility in power generation. Instant utilization and energy output due to battery electrochemical technology and the technology of electricity production using gas-piston units can be combined into a single most efficient system.

What is a microgreen containerized energy storage solution?

The core technology used in Microgreen containerized energy storage solutions are top quality Lithium Ferrous Phosphate (LFP) cells from CATL. CATL's 280Ah LiFePO<sub>4</sub> (LFP) cell is the safest and most stable chemistry among all types of lithium ion batteries, while achieving 6,000 charging cycles or more. CATL serves global automotive OEMs.

What certifications does the Delta LFP battery container have?

Redundant communication and control ensure the system remains controllable and achieves set performance at all times. The Delta's LFP battery container has completed UL 9540A testing and obtained UL 1973, IEC 62619 (including thermal runaway), UN38.3, and IEC 60730 certifications.
