

**EQACC SOLAR**

# **Mozambique inverter power**

## Overview

---

How can Mozambique become a regional energy hub?

Mozambique needs to invest US\$ 6.5 billion<sup>4</sup> in power generation, through a mix of renewable and gas projects, and in upgrading its stressed and fragmented electricity grid particularly as it aspires to become a regional energy hub.

Why is Mozambique a major energy exporter?

Mozambique is a net exporter of energy to countries in the Southern African Power Pool (SAPP) – South Africa being the largest importer. The government view energy exports as a key driver of the Mozambican economy, having passed a new electricity law that simplifies permitting and encourages IPPs activities.

How much electricity does Mozambique have in 2021?

Despite this huge generation potential only 38.6%<sup>1</sup> of its population had access to electricity in 2021. The total installed power capacity in Mozambique stood at around 2,800 MW in the year 2021 whereas the peak demand reported by the state-owned energy utility Electricidade de Moçambique (EDM) was at 1,035 MW.

Why is Mozambique focusing on hydropower projects?

Since Mozambique has high hydro power potential, the country is focusing on developing large hydro projects that aim to be operational at the beginning of 2030's. Hydropower projects play an important role in decarbonizing the power sector in Mozambique.
