

**EQACC SOLAR**

# **Mozambique rooftop solar solar container power supply system**

## Overview

---

Are solar energy systems a viable solution to Mozambique's energy challenges?

In summary, solar energy systems in Mozambique provide a practical, eco-friendly, and increasingly affordable solution to the country's unique energy challenges, fostering sustainable development while enhancing the resilience of its energy infrastructure.

Who built Mozambique's first large-scale solar power plant?

Capital and expertise from Scatec Solar, KLP and Norfund enabled the construction of Mozambique's first large-scale solar power plant. Central Solar de Mocuba (CESOM) provides over 79 GWh of electricity annually, which is equivalent to the electricity consumption of more than 170,000 households in Mozambique.

Why is solar energy important in Mozambique?

In Mozambique, the adoption of solar energy systems is particularly crucial due to several key factors inherent to the country's situation. Firstly, Mozambique has a high solar irradiation level, making it an ideal location for harnessing solar energy.

What is central solar de Mocuba?

Central Solar de Mocuba has increased Mozambique's energy generation capacity by 40 MW and will produce approximately 79 GWh per year. The project's strategic location will reduce energy transmission losses and improve the security of energy supply in northern Mozambique and stabilize the grid.
