Namibia 60MW Compressed Air Energy Storage Project

Overview

Can compressed air energy storage improve the profitability of existing power plants?

Linden Svd, Patel M. New compressed air energy storage concept improves the profitability of existing simple cycle, combined cycle, wind energy, and landfill gas power plants. In: Proceedings of ASME Turbo Expo 2004: Power for Land, Sea, and Air; 2004 Jun 14-17; Vienna, Austria. ASME; 2004. p. 103-10. F. He, Y. Xu, X. Zhang, C. Liu, H. Chen.

What is compressed air energy storage (CAES)?

Compressed air energy storage (CAES) is an effective solution for balancing this mismatch and therefore is suitable for use in future electrical systems to achieve a high penetration of renewable energy generation.

What happened to Gaelectric energy storage?

Gaelectric Energy Storage company, which administrated this project, withdrew its planning application . The Israeli technology company—Augwind, founded in 2012, announced that a small-scale air-battery energy storage pilot was almost completed in the Arava Desert, Israel.
