# Namibia s solar energy storage accounts for 18

## Overview

---

Is solar energy a free commodity in Namibia?

Our solar resource is an entirely free commodity, and as shown in Figure 50, is excessively abundant in many parts of Namibia. In particular, storage systems allow CSP plants to having few equals." most parts of the country." produce electrical energy during the Namibian evening peak consumption time. Storage.

Should Namibia invest in solar power?

Investments that merely perpetuate import dependencies do not have such advantages. Namibia's world-class solar regime can readily be utilised by solar water heaters, solar photovoltaic technologies, and concentrated solar power plants. These technologies can also contribute to reduce the country's immediate electricity supply gap.

Is Namibia Greening the energy sector?

As part of the country's greening of the energy sector in in north-central Namibia. This study covers applications in solar photovoltaic and solar thermal technologies, and also reflects on the costs and benefits of their wider use. The local growth imperatives. The study also considers concentrated solar and wind power to provided to the nation.

How much does solar electricity cost in Namibia?

system installed in an urban area in central Namibia. It is assumed that the location has a N\$25,000 to N\$30,000 [4.18]. electricity not consumed is fed into the existing electrical grid. The solar electricity not have to purchase grid electricity when sufficient solar electricity is available.
