Netherlands container solar air conditioning

Overview

Which air conditioning systems are suitable for shipping containers?

There are various air conditioning systems suitable for shipping containers, including window units, mini-split systems, and rooftop HVAC units. The choice depends on factors such as container size, power availability, and your specific cooling requirements. We'll help you select the right system for your shipping container.

What is a container air conditioner?

The container air conditioner is specially developed for factory prefabricated modules. It's suitable for all walks of life that require factory prefabrication and modularization, such as energy, electricity, communication, experimental research, plant cultivation, and new retail. Parameters: Ambient range: Standard is $-15^{\circ}\text{C}\sim+55^{\circ}\text{C}$.

How do I choose a cooling system for my shipping container?

Cooling Capacity: Determine the cooling capacity needed based on the size of your shipping container and the climate conditions in your area. **Power Requirements:** Ensure that your electrical system can handle the power demands of the chosen air conditioning system.

How do I choose a shipping container air conditioning system?

Larger containers or those with poor insulation may require more powerful units to effectively cool the space. The climatic conditions and average ambient temperature of the location where your shipping container will be placed are instrumental in selecting the appropriate air conditioning system.
