

**EQACC SOLAR**

# **New Delhi 2kw wind power generation system**

## Overview

---

What is en-2kw-q5 wind turbine?

The permanent magnetic EN-2KW-Q5 wind turbine is combined by savonius and darrieus turbines, has high-efficient energy output, is the most compact, quiet, rugged and reliable vertical axis small wind turbine. The EN-2KW-Q5 wind turbine is widely used in LED lighting system, signal & camera security, telecommunication field for off-grid residence.

What has TYHI done for the wind industry?

From the development of TYHI's speed increasers and main shafts for wind turbines to the development of the first variable-speed doubly-fed constant frequency 1.5MW wind power generator TYHI has made significant breakthroughs in wind turbines. [read more](#). Many remote towns or sparsely populated areas are not serviced by the main power grid.

What type of generator does a wind turbine use?

A: Our wind turbines uses a three-phase permanent magnet synchronous generator. Its advantages is simple structure, small volume, light weight, small loss, high efficiency and high power factor. It is mainly used for high performance servo drive systems and DC generator replacement where require a quick and precise correspond and wide speed range.

Are urban small wind turbines suited for this nascent market?

Unfortunately, most of the wind resources currently available have been designed for larger, rural-mounted turbines; thus, they are not well suited for this nascent market. A consequence of this is that many potential urban small wind turbine owners over-predict their local wind resource, which is both costly and inefficient.

## New Delhi 2kw wind power generation system

---

### 2KW Wind Turbine System

Our compact and efficient 2kW wind turbine system is a versatile renewable electricity solution tailored for a variety of applications. Whether it's powering homes in remote areas, supporting ...
