# **New Energy Battery Cabinet Production Plant**

## Overview

---

What is China's new energy storage plant?

Located in Shanghai's Lingang Free Trade Zone, the plant aims to bolster global energy storage capacity by producing 10,000 Megapacks annually, equivalent to 40 GWh of energy storage. These lithium-ion battery units are designed for large-scale commercial and utility projects, helping stabilize power grids and support renewable energy integration.

When will Megapack energy storage batteries be made?

Less than a year after construction began, the new mega-factory in Shanghai dedicated to the production of Megapack energy storage batteries is complete and operational. Mass production is expected to reach full capacity in the first quarter of 2025.

What is Tesla's new energy storage plant in China?

The facility, first announced in April 2023, marks Tesla's continued expansion in China, the world's largest electric vehicle and energy storage market. Located in Shanghai's Lingang Free Trade Zone, the plant aims to bolster global energy storage capacity by producing 10,000 Megapacks annually, equivalent to 40 GWh of energy storage.

Who makes Tesla Megapack battery cells?

Tesla has signed its first Megapack orders with the Shanghai Lingang Economic Development Group. The main supplier of Megapack battery cells is CATL (80 per cent), but the company has partnered with FinDreams, a battery manufacturing unit of BYD, to supply battery cells for the Megapacks starting in the first quarter of 2025.
