# **New Energy Storage Power in the Middle East**

## Overview

---

As September 2025 draws to a close, the Middle East's renewable energy storage sector is charging ahead with groundbreaking announcements, financial closes, and operational milestones that underscore the region's pivotal role in the global #EnergyTransition. Is the Middle East ready for battery storage?

The Middle East region has been relatively slow in its adoption of battery storage compared to more mature markets like China and the US. However, it is predicted to rapidly catch up based on policy announcements such as Saudi Arabia's Vision 2030 strategy.

How big is the battery market in the Middle East and Africa?

Market forecasts suggest that the Middle East and Africa battery market is projected to grow to \$9.98 billion by 2029, driven by policy support, increasing electrification, and a rise in renewable energy investments.

Why is Middle East energy launching a 49th consecutive year in Dubai?

"The continued organization of Middle East Energy for a 49th consecutive year in Dubai reflects international confidence in the emirate as a strategic centre for conferences and exhibitions, and reinforces its role in leading the global dialogue on energy security and sustainability," stated Sheikh Ahmed.

Who inaugurated Middle East energy 2025?

Held under the auspices of the UAE Ministry of Energy and Infrastructure, this edition marks the largest in its 49-year history, emphasizing innovation in energy storage and infrastructure. H.H. Sheikh Ahmed bin Saeed Al Maktoum, chairman of the Dubai Supreme Council of Energy, officially inaugurated Middle East Energy 2025.
