OUTDOOR MODULE CABINET

Overview

What are flow batteries used for?

Flow batteries help create a more stable grid and reduce grid congestion and fill renewable energy production shortfalls for asset owners. Global R&D is fueling the development of flow battery chemistry by significantly enabling higher energy density electrodes and also extending flow battery applications.

How will the flow battery market grow?

The flow battery market is expected to grow significantly as the share of renewables increases in the primary energy mix. Despite their higher CapEx cost compared to lithium-ion batteries, flow batteries are expected to be used extensively for both front-of-the-meter and behind-the-meter applications in the next several years.

Who makes flow battery chips?

Major Flow Battery Chip companies include: Sumitomo Electric Industries, Ltd. Sumitomo Electric Industries, Ltd., a world-class manufacturer of optical fiber cables and electric wires. The company operates through five business segments—Automotive, Electronics, Info communications, Environment and Energy, Industrial Materials, and Others.

Are flow batteries the future of energy storage?

Flow batteries, with their ability to create a more stable grid and reduce grid congestion, are considered a promising technology for energy storage. Their adoption is closely linked with the surging energy storage market and can help fill renewable energy production shortfalls.

New Flow Battery Companies

Here's the Top 10 List of Flow Battery Companies (2025)

What is a flow battery made of? Who makes flow batteries? Check out our blog to learn more about our top 10 picks for flow battery companies.
