New solar panels in Paris

Overview

How many GW of solar power is installed in France?

Overall, out of the 23.7 GW cumulative, 22.9 GW is located in mainland France. France needs to install more than 12 GW of new capacity between now and 2028, by when the government targets to achieve between 35.1 GW to 44 GW of cumulative solar PV capacity under its Multi-Year Energy Programme (PPE).

Is residential solar PV a big market in France?

While residential solar PV is by no means a small market in France, most of the country's solar capacity is derived from large-scale solar utility projects. We'll be taking a close look at 15 of the most significant solar power farms in France below.

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

Can you sell solar panels in France?

In France, it is possible to sell the electricity produced by your solar panels to EDF or another energy supplier. The feed-in price depends on the power of your installation and the conditions of the contract. The average lifespan of solar panels is around 25 years.
