Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select the ideal AC UPS and ensure superior system availability.

Why should you choose Phoenix Contact uninterruptible power supplies?

Ensure superior system availability with our power supply systems. Find out about power supplies, DC/DC converters, redundancy modules, and uninterruptible power supplies for various requirements and industries. Phoenix Contact uninterruptible power supplies for AC and DC applications provide reliable protection against supply interruptions.

What is a DC-UPS power supply?

DC-UPS (Direct Current Uninterruptible Power Supplies) are essential wherever reliable backup of auxiliary circuits is critical to ensure system integrity and the safety of people and equipment.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and revenue.
