

EQACC SOLAR

Nordic solar glass module conversion rate

Overview

Equipped with high-efficiency N-type TOPCon solar cells with up to 25% cell conversion efficiency, assembled glass-glass modules can achieve over 23% module efficiency under standard testing conditions. How big is the Solar Photovoltaic Glass market?

Image © Mordor Intelligence. Reuse requires attribution under CC BY 4.0. The solar photovoltaic glass market size reached 32.10 million tons in 2025 and is forecast to reach 74.75 million tons by 2030, advancing at an 18.42% CAGR between 2025 and 2030.

Why is glass/glass photovoltaic (G/G) module construction so popular?

Glass/glass (G/G) photovoltaic (PV) module construction is quickly rising in popularity due to increased demand for bifacial PV modules, with additional applications for thin-film and building-integrated PV technologies.

What are glass-glass PV modules?

Glass-glass PV modules, also known as double glass solar panels, are photovoltaic modules encapsulated with tempered glass on both the front and back sides. Compared to traditional glass-backsheet modules, they offer greater durability and environmental resistance.

Why is NSG launching a new solar glass production line?

January 2025: NSG Group has commenced operations of a new solar glass production line in the United States, strengthening its position in the solar photovoltaic glass market. This development is expected to enhance the supply of high-quality solar glass, supporting the growing demand in the renewable energy sector.

Nordic solar glass module conversion rate

Solar expansion in Nordic countries

Solarwatt premium glass-glass modules account for 90% of the company's module sales in the region. The modules come with a 30 ...
