# **North Macedonia solar air conditioning standard code**

## Overview

---

Does North Macedonia need electricity?

Although North Macedonia's renewable energy potential is huge (especially solar), the country is still dependent on importing electricity -imported electricity constitutes around 30% of the overall gross consumption.

Which energy sources are used in North Macedonia?

At the moment, most of the electricity in North Macedonia is produced from thermal power plants with coal as the primary energy source. The share of the renewable energy sources in the total installed capacity in North Macedonia is 38%, with most of the renewable energy coming from large hydro powerplants.

How many solar plants are there in North Macedonia?

This is a huge number for North Macedonia as the biggest solar plant at the moment is only 17MW, with the second biggest being 10MW. According to the RKE 2022 Annual Report, 267 new renewable energy power plants are currently in the works (with solar plants having the biggest part - 254 plants).

What is the ISO code for North Macedonia?

The ISO 3166-1-Alpha-2, or two-letter country code, for North Macedonia is MK, while the ISO 3166-1-Alpha-3, or three-letter country code, is MKD, and the ISO 3166-1 numeric code is 807. ISO, the International Organization for Standardization, is a global federation of national standards bodies.
