

# Off-grid cost of solar-powered containerized mining equipment in Europe

## Overview

---

What is an off grid solar container unit?

Attaching to the grid can also be expensive and this can be an issue in the UK as well as Africa or Latin America. An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

How can a solar energy system help the mining industry?

The system will help the mines reduce diesel consumption and power their operations with clean, reliable energy. Senegal is another great example. A 20 MW solar project, paired with 11 MWh of energy storage, will supply sustainable power to the national grid.

Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.

Is solar a viable alternative energy source for mining operations?

Across the industry, mining operations are discovering that solar is not just an alternative energy source; it's a more efficient and cost-effective way to power their sites. The real value of solar lies in its predictability and scalability.
