# **Off-grid solar-powered containerized automated hospital use**

## Overview

---

Can off-grid solar be used in mobile clinics?

The integration of 10kW off-grid solar systems into mobile clinics marks a significant leap forward in making healthcare accessible, sustainable, and environmentally friendly in remote areas.

Why do mobile clinics need a 10kW off-grid Solar System?

Mobile clinics often operate in diverse environments, from arid deserts to dense forests. The versatility of the 10kW off-grid solar system allows these healthcare units to adapt to different climates and terrains, ensuring that renewable energy remains a reliable source of power regardless of location.

What is a solar powered clinic?

Our solar powered clinics have been designed and engineered to be energy efficient, operating on less than 500 watts of electricity. From the air-conditioning system to the choice of lighting, our clinics utilize only green technology and medical equipment.

Can solar-powered mobile clinics transform healthcare delivery models?

As the success stories of solar-powered mobile clinics unfold, there is potential for widespread adoption and scalability. The 10kW off-grid solar system can be a catalyst for transforming healthcare delivery models globally, especially in regions where establishing traditional infrastructure is challenging.
