On grid hybrid solar inverter in Melbourne

Overview

What is a hybrid inverter?

A hybrid inverter (also known as a multi-mode inverter) is capable of managing the electricity output of solar panels and charging a battery system, while also operating with mains grid supply. Given this extended capability, they cost more than standard string solar inverters.

Are hybrid inverters a good choice for home solar?

As solar technology improves, hybrid inverters are now key for home solar systems. In 2025, the best hybrid inverters are efficient, reliable, and suited to Australia's energy needs. A hybrid inverter is a device that lets you use more of your solar power, save money by using less electricity from the grid, and keep the lights on during blackouts.

Is a hybrid solar system a viable option in Melbourne?

With the advancement of technology and low battery prices, hybrid solar system in Melbourne is becoming cheaper than ever and has turned out to be a feasible option with the grid connected solar systems. At Online Air & Solar, we have a team of CEC accredited installers having years of experience in hybrid solar panels installation and maintenance.

What is a hybrid solar system?

A hybrid system has a backup battery system in addition to solar panels that are wired directly to the grid. These systems convert the solar energy into electricity via an inverter which stores some ratio of energy for usage at night or on days with insufficient sunlight.
