

EQACC SOLAR

One-trailer long lighting time solar lamp

Overview

What is a mobile solar light tower?

The mobile solar light tower is a portable lighting system integrating solar panels, LED lighting, intelligent control, 4G monitoring system, communication base station, and a hybrid battery storage of solar and grid electricity, suitable for various temporary or long-term lighting needs.

How big is a mobile light trailer?

Medium Model mobile light trailer, height 9 meters (29 feet), can illuminate 1500 square meters, equivalent to lighting up 3 standard basketball courts; suitable for construction sites, disaster relief, mining areas, etc.

How does a mobile LED light tower work?

The mobile LED solar lighting light tower require no engine maintenance, no fossil fuels and no frequent bulb replacement and can generate economic benefit of about \$4,000 per year. The lighting consists of two 100 W LED lights. The pole has a steel cable as an adjustment device that can be manually operated with a hand winch.

How long does a LED light last?

Battery Storage and Endurance: Uses durable and efficient batteries, fully charged in 8 hours and can work continuously for 21-28 hours. It has both solar and grid electricity charging functions for dual assurance. **LED Lighting Technology:** High-performance LED fixtures with a light efficiency of up to 165 lm/W, providing wide lighting coverage.
