Onsite Energy Solar Panels Sold Individually

Overview

What is on-site solar?

On-site solar refers to a solar energy system that is installed directly on the property where the energy will be used. This is the most common form of solar energy generation for residential homes and commercial buildings.

Should I Choose on-site or off-site solar?

Choosing between on-site and off-site solar depends on your specific circumstances, preferences, and goals. If you have the space, budget, and desire to generate your own energy, on-site solar may be the right choice. It offers the most control, potential cost savings, and a direct impact on your property's value.

Why should you choose on-site solar?

Control Over Energy Production: With on-site solar, you have complete control over your energy production and usage. You can monitor system performance and make adjustments to maximize efficiency. **5. Environmental Impact:** On-site solar reduces your carbon footprint by allowing you to generate clean, renewable energy on your own property.

When is a solar system considered an onsite system?

When a solar system is installed directly on the purchaser's property, and the renewable energy that it produces is consumed there, it's considered an onsite system.
