# **Outdoor Mobile Energy Storage Power Plant in Barcelona Spain**

## Overview

---

Why do we need battery energy storage systems in Spain?

Due to the large capacity of installed hydroelectric and thermal storage systems and the resilience of the Spanish power grid, the need for Battery Energy Storage Systems (BESS) in Spain has been relatively low. The lack of a clear regulatory framework for BESS has also hindered its development in Spain so far.

What is Casablanca solar power plant – thermal energy storage system?

The Casablanca Solar Power Plant – Thermal Energy Storage System is a 50,000kW molten salt thermal storage energy storage project located in Talarrubias, Badajoz, Spain. The thermal energy storage battery storage project uses molten salt thermal storage storage technology.

What is Caceres solar power plant – thermal energy storage system?

The Caceres Solar Power Plant – Thermal Energy Storage System is a 50,000kW molten salt thermal storage energy storage project located in Caceres, Valdeobispo, Extremadura, Spain. The thermal energy storage battery storage project uses molten salt thermal storage storage technology. The project will be commissioned in 2013.

How much energy storage capacity does Spain have?

When it comes to installed energy storage capacity in general, Spain is one of the leading countries within Europe (see figure 2). Currently, Spain has 6.3GW of hydroelectric and 1GW of thermal storage capacity installed. In fact, the non-BESS storage capacity in Spain is higher than in any other European country.
