## Overview

---

What are the best portable power stations in New Zealand?

Grid Escape's ATB & Pecron Portable Power Stations range are designed to withstand New Zealand's harsh elements. These compact yet robust units are perfect for any scenario, whether exploring the great outdoors, powering through work at a remote construction site, or staying prepared during an unexpected power outage.

Does Power Station have an off-grid system?

For your peace of mind, Power Station's full off-grid systems are approved and certified in NZ. Power Station systems have true off-grid capability with generator backup, with the option to connect to the grid as a battery backup. Start with the essentials, then add more panels or batteries later based on your budget and goals.

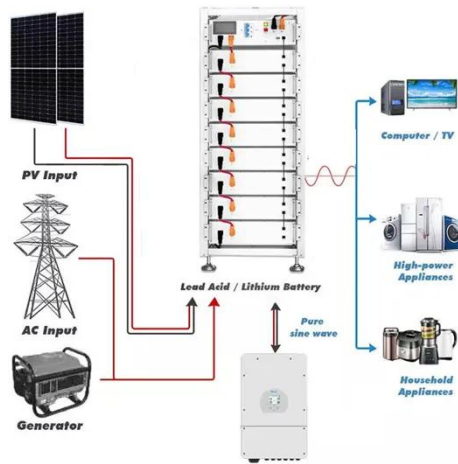

Do you need a portable power station?

If you go camping or take road trips often, a portable power station can be an absolute game-changer! It lets you recharge almost any device on the go so that you can keep using your laptop or tablet even across weekend trips. It also works as a backup supply during power outages at home, although our generators are ideal for this purpose.

How much does a power station Solar System cost?

Pricing starts at \$29,500 inc GST for an 'average' home. The Power Station Independent Energy System (IES) is a new concept in independent living. Made by Power Station in New Zealand, it's a fully off-grid solar power system that can be installed in an existing grid-connected home.
