Outdoor power station factory in Niger

Overview

Who manages power plants in Niger?

These plants are managed by generation companies (GenCos), independent power providers, and Niger Delta Holding Company. The primary independent power plants before the power sector reforms are Shell-owned Afam VI (642MW), Agip-built Okpai plant (480 MW), and AES (270 MW).

How many power stations are there in Nigeria?

There are two forms of power stations in Nigeria and they are; hydro and Gas. There are currently twenty-eight (28) grid-connected power stations in Nigeria. Egbin thermal plant has been the largest Gas plant, while the Mambilla power plant is the biggest hydroelectric power station but is still under construction.

Are there hydroelectric power stations in Nigeria?

Here is the updated list of the hydroelectric power stations in Nigeria, though there are some that are not mentioned above because they are still under construction or regarded to be a proposed project.

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.
