

# Pakistan A solar glass revenue

## Overview

---

Why is Pakistan a big market for solar energy?

Pakistan has quickly become one of the world's biggest markets for solar energy. This solar boom has been driven in large part by consumers who are fed up with sky-high electricity costs. The White House is one step closer to defunding public radio.

What is solar energy in Pakistan?

Solar energy is the heat and radiant light from the sun that can be harnessed with technologies such as solar power (used to generate electricity) and solar thermal energy (used for applications such as water heating). The Pakistani solar energy market is segmented by end users (residential, commercial, and utility).

Why is solar energy rising in Pakistan?

The rapid rise of solar energy in Pakistan is a direct response to the country's ongoing energy crisis and the broader global shift toward renewable energy. According to InfoLink's data, Pakistan's solar module demand reached approximately 3.5 GW in 2023 and is expected to rise to between 6.5 and 8 GW by 2024.

How many solar projects are there in Pakistan?

According to the Private Power and Infrastructure Board of the Ministry of Energy, seven 530-megawatt solar projects are operational and supplying electricity to the national grid. Pakistan's renewable energy mix consists of solar, wind, hydroelectricity, and bioenergy.
