Panama Communications Micro Base Station

Overview

What is LBA 3 micro base station?

It is below 300m. In the hybrid communication model, LBA 3 can effectively cover the signal-blind area of communication and obtain reliable communication quality. LBA 3 micro base station supports access to CUAVCloud and other UAV cloud platforms, to realize more advanced functions such as UAV management, team collaboration, remote.

What is CUAV LBA 3 UAV communication micro basestation system?

CUAV LBA 3 UAV Communication Micro BaseStation private network micro-base station system is a high-performance UAV long-distance and large-bandwidth link system solution independently developed by Leixun Innovation. It consists of a LBA3 Base, an air terminal, and an AG gateway.

What is LBA 3 micro UAV base station?

The LBA 3 micro UAV base station adopts a dustproof, waterproof, and corrosion-resistant design, which can be placed outdoors for a long time without fear of wind and sun. It perfectly solves the problem of repeated installation in high-frequency and automated application scenarios, reduces repetitive work, and improves work efficiency.

What is a base station?

Base stations are one of the widely used components in the field of wireless communication and networks. It is an access point or base point of a particular area for network accessibility. In this article, we will discuss the different types of base stations with their advantages and applications in the real world.
