# **Paris solar Module Production Project**

## Overview

---

French renewables startup Holosolis, founded by EU independent body EIT InnoEnergy, on Monday announced plans to construct a 5GW solar photovoltaics (PV) module assembly plant in northeast France, PV Tech reports. Will a 5-gigawatt solar panel factory be built in eastern France?

Elise Bruhat from Holosolis introduced their ambitious project of establishing a 5-gigawatt solar panel factory in Eastern France. This initiative aims to reduce Europe's heavy reliance on Asian imports, which currently account for over 95% of its solar panels, and retain more value within Europe by creating jobs and investing locally.

How many photovoltaic panels will be produced in France in 2026?

"By mid-2026, the production of photovoltaic panels and cells will start, with ultimately more than 10 million panels produced in France to serve our country and Europe," said Holosolis CEO Jacob Boom-Wichers. Holosolis plans to build its facility in Hambach, near Sarreguemines, northwestern France.

Will a 5GW solar module assembly plant be built in France?

The goal is simple: to map out the PV module supply channels to the U.S. out to 2026 and beyond. French startup Holosolis, founded by innovation group EIT InnoEnergy, has planned to build a 5GW solar module assembly plant in France.

Are carbon & holosolis building 5 GW solar panels in France?

Carbon and Holosolis have both requested construction permits for 5 GW solar panel factories in France. From pv magazine France French PV module manufacturers Carbon and Holosolis said this week that they have both filed requests for construction permits to build 5 GW solar cell and module manufacturing facilities in France.
