# **Payment Method for 500kW Saudi Solar Containerized Photovoltaic Unit**

## Overview

---

Could a power purchase agreement make large-scale solar projects viable in Saudi Arabia?

Saudi scientists have determined the current price threshold for power purchase agreements (PPA) that could make large-scale PV and wind power projects viable in Saudi Arabia. They incorporated data from the 300 MW Sakaka solar farm and four potential utility-scale PV project sites.

How many solar projects does ACWA Power have in Saudi Arabia?

With this announcement, ACWA Power's overall portfolio of solar projects in Saudi Arabia now stands at 14, representing more than 17,800 MW of combined PV capacity. It also brings ACWA Power's total renewable capacity portfolio to 35,000 MW. PIF has identified utilities and renewables as one of the 13 strategic sectors in its planning.

How many solar projects are there in Saudi Arabia?

The three solar projects are: Starting 2024, the Kingdom of Saudi Arabia will tender annually new renewable energy projects with a total capacity of 20 GW with the aim of reaching between 100 to 130 GW by 2030, depending on the growth of electricity demand.

How much will solar power add to the national power grid?

With a combined value of SAR12.3 billion (USD3.3 billion), the new solar PV facilities are expected to contribute an additional 5,500 MW of renewable energy to the national power grid once operational in the first half of 2027. Financial closes are expected by the fourth quarter of 2024.
