Philippines Energy Storage and Power Battery Project

Overview

Can battery energy storage systems be deployed in the Philippines?

In the Philippines, battery energy storage systems are still in their nascent stages. While policies like the inclusion of Integrated Renewable Energy and Energy Storage Systems (IRESS) in national auction programs have been put in place, actual deployment faces significant hurdles.

Does Aboitiz Power have a hybrid energy storage system in Cebu?

Aboitiz Power Corporation, one of the Philippines' major utilities, has launched a project that reflects this shift toward hybrid infrastructure. The company is constructing a 30-megawatt hybrid Battery Energy Storage System (BESS) in Cebu, in collaboration with East Asia Utilities Corporation.

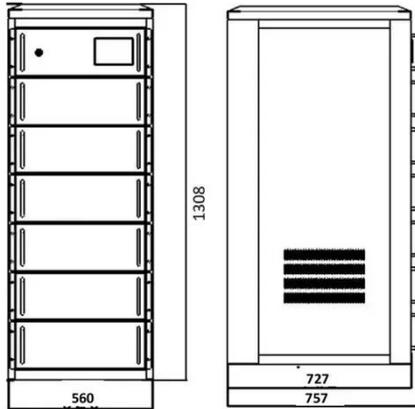

Is the Philippines integrating energy storage into its energy mix?

She highlighted the country's existing large-scale pumped hydro facility and a target of 1.1 GW for IRESS deployment through the Green Energy Auction Program, showcasing the Philippines' dedication to integrating energy storage into its energy mix.

Why is battery storage important in Southeast Asia?

With energy demand soaring in the region, battery storage is a crucial technology for ensuring stable, reliable, and clean power systems." Kitty Bu, Vice President, Southeast Asia at GEAPP, echoed this sentiment, highlighting the dual nature of rapid renewable growth. "It's both a remarkable achievement and a significant challenge," she noted.
