# **Port Moresby Mobile Energy Storage Container 60kW**

## Overview

---

How much does Port Moresby power station cost?

The Project is designed to be capable of staged expansion to approximately 175 MW with the cost for the initial 58 MW plant being ~US\$100 million. This investment is underpinned by a long term Power Purchase Agreement (PPA) with PNG Power Limited. The Port Moresby Power Station during construction in October 2018.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.
