# **Portable power solar station in Spain**

## Overview

---

Where is solar power based in Spain?

The company currently operates 2.4GW of solar capacity, predominantly in southern Spain where solar resources are most abundant. Their integrated approach combines solar generation with storage solutions and smart grid technologies, creating more reliable and valuable renewable assets.

Why should you choose solar in Spain?

Discover life in Spain the way it should be: sunny, simple, and stress-free. Since 1999, Solar in Spain has been helping homeowners and businesses across the country harness the power of the sun. With over 5,000 successful installations and more than 25 years of experience, we are one of Spain's most trusted solar energy providers.

How much solar energy does Spain use?

In 2018, the country installed 7,011 megawatts of solar energy overall, with 4,707 megawatts of solar PV installations and 2,300 MW of CSP. According to a 2016 study conducted by energy consumption experts Mirubee, by installing solar panels for residential purposes consumers in Spain can save approximately 24% on their monthly electricity bills.

Who are the best solar mounting solutions in Spain?

With their "Do it right the first time" philosophy and extensive product range available through components and accessories, Grace Solar has become the preferred mounting solutions partner for Spain's rapidly expanding solar market.
