

**EQACC SOLAR**

# **Portable power source factory in Czech-Republic**

## Overview

---

What is the energy industry like in the Czech Republic?

Czech industry has a long history of supply activities in the energy sector; historically, 90% of the equipment was manufactured domestically, including key components for nuclear power plants.

What is the main source of electricity in Czechia?

A paid subscription is required for full access. Coal is the most used source for electricity production in Czechia. In 2023, both lignite and hard coal accounted for a combined 40.21 percent of total electricity generation. Followed by nuclear power with 39.91 percent.

Who makes the equipment for Czechoslovak nuclear power plants?

90% of equipment for Czechoslovak power plants, including nuclear power plants, was manufactured by domestic companies. We work in accordance with the requirements of the Updated State Energy Concept and the National Action Plan for the Development of Nuclear Energy.

Where is Chomutov made?

Our team in Chomutov works closely with our high-end German manufacturing facility in Drebach, which is responsible for producing value-added services solutions and custom products. The Chomutov site offers a wide range of production options and serves as a backup for our Suzhou production, ensuring continuity and flexibility.
