

EQACC SOLAR

Power generation equipment container room

Overview

What is a containerized generator enclosure?

Our containerized generator enclosures are built to be highly mobile, allowing you to easily transport and relocate your generator equipment as needed. The modular design enables quick assembly and disassembly, making it an excellent choice for temporary power needs or projects requiring frequent relocation.

What is containerized equipment room (E-House)?

Containerized Equipment Room (E-House) offers a secure, space-efficient solution for housing critical electrical components in harsh and remote environments. Designed to support both standard and demanding applications, it ensures reliable power continuity and system protection even in the most challenging conditions.

What is a containerized equipment room?

The Containerized Equipment Room, or E-House, is designed and constructed to provide a secure and convenient space for housing essential electrical components and ensuring electricity production in harsh environments.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.
