

**EQACC SOLAR**

# **Praia Backup Uninterruptible Power Supply**

## Overview

---

Are battery-backed uninterruptible power supplies reliable?

Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptible power supplies (UPS) are one option to protect and keep electronic equipment operating in the event of grid power failure.

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is way more than just a surge protector, it's meant to save your time as well as your devices. These surge protectors with a built-in backup battery provide a safety net by delivering continuous power during an outage, giving you time to save your work and safely shut down your equipment.

How do I choose a reliable uninterruptible power supply (UPS) system?

When it comes to selecting a reliable Uninterruptible Power Supply (UPS) system, it's important to choose a trusted supplier. Unikeyic Electronics offers a wide range of high-quality UPS systems that cater to various industries, ensuring that your critical equipment is always protected.

What does a UPS do if a power supply fails?

The system remains in standby mode, monitoring the main power supply. When it detects a power failure, the UPS switches to backup power from the battery within milliseconds. Best For: Low-power applications, such as home computers, gaming systems, small office equipment, and personal devices.
