

**EQACC SOLAR**

# **Price of a 20kW Solar Containerized Container for Australian Farms**

## Overview

---

How much does a 20 kW solar system cost in Australia?

Many high-quality 20 kW systems in Australia in 2025 land around \$19,000–\$24,000, depending on component brands, installation complexity, and local incentives. Installed battery cost around \$1,200 per usable kWh. You should combine these two buckets to estimate your total project price: 20 kW PV only: ~\$19,000–\$24,000.

How much does a 20kW Solar System cost?

You can expect to pay around \$19,771 for a 20kW system installed. Prices can vary wildly depending on the quality of panels you install and the company that quotes the job. The above price is after you have received your government rebate (\$6,584 for 20kW systems) and does not include the price for battery backup.

What is a 20kW commercial solar PV system?

A 20kW commercial solar PV system is ideal for businesses with low to medium energy usage. Rising grid electricity prices make this an even more attractive option. Should you have sufficient roof space, a 20kW solar system can also be outfitted into larger residential homes to effectively boost savings while meeting their power needs.

How much does a 20 kW battery cost in Australia?

Many high-quality 20 kW systems in Australia in 2025 land around \$19,000–\$24,000, depending on component brands, installation complexity, and local incentives. Installed battery cost around \$1,200 per usable kWh for larger systems.
