Price of high power super capacitor in Israel

Overview

Will India's first 3000f supercapacitor be used for electric vehicles?

In September 2022, India's leading lithium-ion cell manufacturer GODI announced the development of India's first ever 3000F supercapacitor that could be used for electric vehicles. This high power supercapacitor is capable of storing and releasing electrochemical energy in order to improve battery life in electric vehicles.

What is the supercapacitors market?

The supercapacitors market is primarily led by the rapid penetration of electric vehicles globally that require energy storage solutions offering not only fast-charging capabilities but also high power density to allow efficient operation.

Why is North America leading the super capacitor market?

In the last 10+ years, North America has taken the lead in the super capacitor market due to its established industrial infrastructure, continued investment in clean energy solutions, and the rapid adoption of electric mobility.

What is the fastest growing supercapacitor market?

Industrial use focuses on reliability and backup power, while other applications include aerospace and medical devices. Asia Pacific is projected to record the fastest growth in the supercapacitor market, with a CAGR of 17.6%.
