

**EQACC SOLAR**

# **Price trend of carbon core battery in energy storage cabinet**

## Overview

---

How much does a commercial lithium battery energy storage system cost?

In 2025, the typical cost of a commercial lithium battery energy storage system, which includes the battery, battery management system (BMS), inverter (PCS), and installation, is in the following range: \$280 - \$580 per kWh (installed cost), though of course this will vary from region to region depending on economic levels.

How much does a battery storage system cost?

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024.

Are solid-state batteries the future of energy storage?

These trends point toward future scenarios of cost reductions and the potential of solid-state batteries. Innovations in energy storage technologies, particularly with lithium-ion and sodium-ion batteries, have substantially reduced costs.

How have energy storage costs changed over the past decade?

Trends in energy storage costs have evolved significantly over the past decade. These changes are influenced by advancements in battery technology and shifts within the energy market driven by changing energy priorities.
