Prices of new solar panels in Israel

Overview

How much would solar panels cost Israel?

The Ministry of Energy and Infrastructure estimates that if there were solar panels on 100,000 homes, these tracks would result in a net cost of an additional NIS 51 million per year for the Israel Electricity Corp., but in the long term these extra costs should balance out, so the total compensation would not change.

Can solar panels be installed on 100,000 roofs in Israel?

As part of its project to install solar panels on 100,000 roofs in Israel, the Ministry of Energy and Infrastructure will initiate two new incentive tracks to be discussed by the Electricity Authority, for those interested in putting solar panels on their homes.

Why do Israelis install solar panels on roofs?

This stems from the advantages that the Ministry of Energy sees in installing solar panels on roofs, including energy efficiency (sometimes there is no need to transfer the electricity to high voltage), decentralization of energy production, and meeting Israel's renewable energy goals.

How much does electricity cost in Israel?

Israel, September 2023: The price of electricity for households is ILS 0.617 per kWh or USD 0.166 per kWh. The electricity price for businesses is ILS 0.393 kWh or USD 0.106 per kWh. This includes all components of the electricity bill such as the cost of power, distribution and taxes.
