

EQACC SOLAR

Procurement of 150-foot folding containers for wastewater treatment plants

Overview

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

What is a containerized package plant?

Containerized Package Plants are a portable and efficient solution for water and wastewater treatment. They offer a plug-and-play option for remote locations, emergency response, or temporary needs, without compromising on treatment quality. These plants are designed to be potable and can be easily transported to new sites as necessary.

What is a clearfox® containerized wastewater treatment plant?

ClearFox® containerized wastewater treatment plants offer a highly cost-efficient solution with low capital and operating expenses, as they require no extensive planning, civil works or permanent buildings. The system only needs to be placed on a solid base and connected.

What size container sewage treatment plant do you use?

For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems. Container sewage treatment plants are mainly used for short-term use in remote areas that are not connected to a sewage system, in camps and on construction sites.

Procurement of 150-foot folding containers for wastewater treatment
