Production of container generator

Overview

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What is container type diesel generator set?

Container type Diesel Generator Set Jet power supply container type generator set is design in accordance with ISO/TC104 standard size, rational construction, to make sure the generator set will not be damaged due to under high pressure in transport, and is suitable for ship transportation.

How does a generator work?

A generator provides standby power until the mains power can be reinstated during a power outage. This is supported by a UPS (Uninterruptible Power Supply) which ensures a seamless transition from your mains power to your backup power supply. Batteries provide power to your UPS and generator.

What are the different types of container generators?

We can supply the 20' container, 40' container, and widen or heighten container type. They are divided into the normal type and silent type. This series generator set can be easily moved to the desired location, can run under the most demanding working conditions.

Production of container generator

Containerised Generators

Bespoke Containerised Generators Our containerised generators are suitable for a wide range of applications, including:
Super Silent: Super silent 65dBA at 1m for prime power running diesel ...

Container Diesel Generators

Description: Container diesel generators are powerful, industrial-grade energy solutions engineered to deliver dependable, large-scale electricity in demanding environments. ...

Container Diesel Generator

Our Container Diesel Generator is an independent power solution housed within a standard shipping container. Designed for backup power, remote ...

Container Diesel Generator

Our Container Diesel Generator is an independent power solution housed within a standard shipping container. Designed for backup power, remote locations, and construction sites, it ...
