Overview

How many solar roof tiles will freesuns produce?

The flexible, automated production allows Freesuns to produce its newly developed matrix shingle roof tiles on a pilot scale before moving into mass production. The production line will manufacture a total of 4,000 solar roof tiles using the matrix shingle technology.

How many solar roof tiles will be made in 2025?

The production line will manufacture a total of 4,000 solar roof tiles using the matrix shingle technology. Since March 2025, the company has produced the first 800 and is currently installing the roof systems into five existing buildings in Switzerland.

How does freesuns make matrix shingle solar roof tiles?

The flexible, automated production allows Swiss project partner Freesuns to produce its newly developed matrix shingle roof tiles on a pilot scale before moving into mass production. The 450 x 510 mm Freesuns matrix shingle solar roof tile consists of a glass-glass module with TOPCon solar cells. Image: Fraunhofer ISE/Sophia Baechle.

What is a 450 x 510 mm solar roof tile?

The 450 x 510 mm solar roof tile consists of a glass-glass module with TOPCon solar cells connected in a shingle matrix, with various color options available. In shingle technology, the solar cell strips are connected to strings using electrically conductive, lead-free adhesives and arranged in an overlapping pattern, like roof shingles.
