Profits of solar panels produced by manufacturers

Overview

Which country produces the most solar panels in the world?

The Asian industry continues to dominate the global ranking of solar panel manufacturers. Chinese companies hold eight of the top ten spots, including the entire podium. Who are the top 10 photovoltaic module producers in the world?

.

How has global solar PV manufacturing capacity changed over the last decade?

Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. China has invested over USD 50 billion in new PV supply capacity – ten times more than Europe – and created more than 300 000 manufacturing jobs across the solar PV value chain since 2011.

How many jobs will the solar PV industry create?

The solar PV industry could create 1 300 manufacturing jobs for each gigawatt of production capacity. The solar PV sector has the potential to double its number of direct manufacturing jobs to 1 million by 2030. The most job-intensive segments along the PV supply chain are module and cell manufacturing.

How can the solar PV industry support growing demand?

Annual investment levels need to double throughout the supply chain. Critical sectors such as polysilicon, ingots and wafers would attract the majority of investment to support growing demand. The solar PV industry could create 1 300 manufacturing jobs for each gigawatt of production capacity.
