

## EQACC SOLAR

**Purchase accessories to  
assemble solar energy on site**

## Overview

---

What equipment do you need to go solar?

To go solar, you'll need solar panels, inverters, racking equipment, and performance monitoring equipment—at a minimum. Depending on where you live, you may also consider a solar battery. The components of a solar panel system are pretty simple.

What solar panel design tools do solar installers use?

Some of the most popular solar panel design tools that solar PV installers use are: PV Tester: The solar business has always required excellent testers, and with so many outstanding alternatives on the market, you are sure to discover the ideal PV tester.

What is a solar panel system?

A solar panel system is a group of solar (or photovoltaic) cells that may generate energy via the photovoltaic effect. On the surface of solar panels, these cells are arranged in a grid-like pattern. As a result, it may alternatively be defined as a collection of photovoltaic modules put on a structure.

What is a photovoltaic module?

On the surface of solar panels, these cells are arranged in a grid-like pattern. As a result, it may alternatively be defined as a collection of photovoltaic modules put on a structure. A photovoltaic (PV) module is a 6\*10 solar cell packed and linked assembly. These panels are extremely resistant to wear and tear.
